

MVP881 BR UNIVERSAL AUDIO/VIDEO PLAYER

Preliminary Product Literature

The new MVP881 BR Universal A/V Player from McIntosh, a high performance Blu-ray player with web-enabled features, excels at playing SACD and DVD Audio discs as well as standard CD's and DVD's. The MVP881 BR features custom fabricated steel and aluminum casework to inhibit resonance while shielding sensitive audio circuits. A McIntosh-designed linear power supply forms the foundation of the electrical design and insures the low noise, distortion free audio and video performance that McIntosh customers insist upon. HDMI 1.3 audio and video is fully supported while a differential balanced, analog audio output stage guarantees superb performance with the finest quality audio systems. The MVP881 BR is destined to become the Go-To source component in McIntosh Home Theater and Music Systems everywhere.
